# Subject Index of Volume 174

Alloy
constitutive description of high temperature creep in mechanically alloyed Al–C–O alloys, 37
effect of temperature rise of sprayed deposits of an Fe–2.19wt.%C–0.68wt.%Si alloy during thermal spraying on the structures and the mechanical properties, 85
effects of alloying additions on the microstructures, mechanical properties and weldability of $Fe_3Al$-based alloys, 59
evolution of microstructure in laser surface alloying of aluminium with nickel, 75
mechanical behavior of powder metallurgy Al–Fe–Ni alloys, 127
observations on deformation characteristics and microstructure in an Al–Mg alloy during serrated flow, 1
on the formation of $\mu$ and $\zeta$ phases in the Ag–Al system by mechanical alloying, 119
surface alloying of copper with chromium by $CO_2$ laser, 199
surface modification of aluminium by electrical discharge alloying, 193
the effect of Widmanstätten-type $\alpha 2$ precipitates on room temperature deformation and fracture behaviour of a $\gamma$–TiAl-based alloy, 45
Aluminium
constitutive description of high temperature creep in mechanically alloyed Al–C–O alloys, 37
effect of post-forging heat treatment on the microstructure and room temperature tensile properties in Ti–25Al–10Nb–3V–1Mo (super $\alpha 2$), 23
effects of alloying additions on the microstructures, mechanical properties and weldability of $Fe_3Al$-based alloys, 59
evaluation of interface stability and melt-processing techniques of $Ni_3Al$/SiC particulate composites, 207
evolution of microstructure in laser surface alloying of aluminium with nickel, 75
mechanical behavior of powder metallurgy Al–Fe–Ni alloys, 127
microstructure and susceptibility to stress corrosion cracking of Al–Zn–Mg weldments (AA-7071), 173
observations on deformation characteristics and microstructure in an Al–Mg alloy during serrated flow, 1
on the formation of $\mu$ and $\zeta$ phases in the Ag–Al system by mechanical alloying, 119
surface modification of aluminium by electrical discharge alloying, 193
the effect of Widmanstätten-type $\alpha 2$ precipitates on room temperature deformation and fracture behaviour of a $\gamma$-TiAl-based alloy, 45
the ion-beam mixing of an aluminium layer with an iron substrate and the migration distance of the aluminium, L33
Austenite
mathematical description for flow curves of some stable austenitic steels, L1

Ball mills
measuring the impact velocities of balls in high energy mills, 71
Boron
investigation of microstructure and crack behaviors in hot-pressed $TiB_2$–$Si_3N_4$ composites, 157
Brazing
brazing residual stresses in components of different metallic materials, 95

Carbon
characterization of W–Me–C (Me = Fe, Co) films and their structural behaviour with temperature, 165
constitutive description of high temperature creep in mechanically alloyed Al–C–O alloys, 37
effect of temperature rise of sprayed deposits of an Fe–2.19wt.%C–0.68wt.%Si alloy during thermal spraying on the structures and the mechanical properties, 85
interaction between thermal recovery and the change in strain path in low carbon steel, 111
laser synthesis of ultrafine $Si_3N_4$–SiC powders from hexamethyldisilazane, L23
selective area carburizing of low carbon steel using an Nd:YAG laser, 231
surface alloying of copper with chromium by $CO_2$ laser, 199
surface segregation in low carbon steels, 187
Carburization
selective area carburizing of low carbon steel using an Nd:YAG laser, 231
Cavities
a simple formula for cavity growth rate considering cavity interlinkage during superplastic deformation, L9
Cell diameter
relationship between the applied stress and cell diameter from the soft and hard region theory, L5
Chromium
surface alloying of copper with chromium by $CO_2$ laser, 199
Cobalt
characterization of W–Me–C (Me = Fe, Co) films and their structural behaviour with temperature, 165
Composites
evaluation of interface stability and melt-processing techniques of $Ni_3Al$/SiC particulate composites, 207
Copper
surface alloying of copper with chromium by $CO_2$ laser, 199
Corrosion
microstructure and susceptibility to stress corrosion cracking of Al–Zn–Mg weldments (AA-7071), 173
protection of duplex stainless steel from localized corrosion by surface "superpassivation", L45
Corrosion properties
submicrocrystalline 18-10 stainless steel: structure formation, mechanical and corrosion properties, 217
Cracking
investigation of microstructure and crack behaviors in hot-pressed $TiB_2$–$Si_3N_4$ composites, 157
microstructure and susceptibility to stress corrosion cracking of Al–Zn–Mg weldments (AA-7071), 173
Creep
constitutive description of high temperature creep in mechanically alloyed Al–C–O alloys, 37
effect of loading ramp on cyclic stress–strain response and cyclic creep behaviour, 15
is creep in discontinuous metal matrix composites lattice diffusion controlled?, 141

Crystals
submicrocrystalline 18-10 stainless steel: structure formation, mechanical and corrosion properties, 217

Debonding
an asymptotic approach for debonding at the fiber–matrix interface, L17
Deformation
a simple formula for cavity growth rate considering cavity interlinkage during superplastic deformation, L9
observations on deformation characteristics and microstructure in an Al–Mg alloy during serrated flow, 1
the effect of Widmanstätten-type $\alpha 2$ precipitates on room temperature deformation and fracture behaviour of a $\gamma$-TiAl-based alloy, 45
Deposition
effect of temperature rise of sprayed deposits of an Fe–2.19wt.%C–0.68wt.%Si alloy during thermal spraying on the structures and the mechanical properties, 85
$Y_2O_3$ film deposition on type 304 stainless steel by a Langmuir–Blodgett technique and its effect on oxidation, L13
Diffusion
approximate solutions to second-phase diffusion-controlled growth and dissolution in finite geometries, L27
investigation of diffusion mechanisms during nickel oxide film growth by an isotope separation technique, 103
self-diffusion of $^{63}Ni$ along dislocations, 9
Dislocation
self-diffusion of $^{63}Ni$ along dislocations, 9
Dissolution
approximate solutions to second-phase diffusion-controlled growth and dissolution in finite geometries, L27

Electrical discharge alloying
surface modification of aluminium by electrical discharge alloying, 193

Fibres
an asymptotic approach for debonding at the fiber–matrix interface, L17
Film growth
investigation of diffusion mechanisms during nickel oxide film growth by an isotope separation technique, 103
Flow curves
mathematical description for flow curves of some stable austenitic steels, L1
Fracture
the effect of Widmanstätten-type $\alpha 2$ precipitates on room temperature deformation and fracture behaviour of a $\gamma$-TiAl-based alloy, 45

Grain boundary sliding
an evaluation of the strain contributed by grain boundary sliding in superplasticity, 225

Hexamethyldisilazane
laser synthesis of ultrafine $Si_3N_4$–SiC powders from hexamethyldisilazane, L23
Hot pressing
investigation of microstructure and crack behaviors in hot-pressed $TiB_2$–$Si_3N_4$ composites, 157

Impact velocity
measuring the impact velocities of balls in high energy mills, 71

Interfaces
an asymptotic approach for debonding at the fiber–matrix interface, L17
evaluation of interface stability and melt-processing techniques of $Ni_3Al$/SiC particulate composites, 207
Ion-beam mixing
the ion-beam mixing of an aluminium layer with an iron substrate and the migration distance of the aluminium, L33
Iron
characterization of W–Me–C (Me = Fe, Co) films and their structural behavour with temperature, 165
effect of temperature rise of sprayed deposits of an Fe–2.19wt.%C–0.68wt.%Si alloy during thermal spraying on the structures and the mechanical properties, 85
effects of alloying additions on the microstructurs, mechanical properties and weldability of $Fe_3Al$-based alloys, 59
mechanical behavior of powder metallurgy Al–Fe–Ni alloys, 127
the ion-beam mixing of an aluminium layer with an iron substrate and the migration distance of the aluminium, L33
Isotope separation
investigation of diffusion mechanisms during nickel oxide film growth by an isotope separation technique, 103

Langmuir–Blodgett technique
$Y_2O_3$ film deposition on type 304 stainless steel by a Langmuir–Blodgett technique and its effect on oxidation, L13
Lasers
evolution of microstructure in laser surface alloying of aluminium with nickel, 75
laser synthesis of ultrafine $Si_3N_4$–SiC powders from hexamethyldisilazane, L23
residual stresses induced in steel by laser melting, L51
selective area carburizing of low carbon steel using an Nd:YAG laser, 231
surface alloying of copper with chromium by $CO_2$ laser, 199
Lattice diffusion
is creep in discontinuous metal matrix composites lattice diffusion controlled?, 141
Loading ramp
effect of loading ramp on cyclic stress–strain response and cyclic creep behaviour, 15

Magnesium
microstructure and susceptibility to stress corrosion cracking of AL–Zn–Mg weldments (AA-7071), 173
observations on deformation characteristics and microstructure in an Al–Mg alloy during serrated flow, 1
Matrices
an asymptotic approach for debonding at the fiber–matrix interface, L17
Mechanical properties
$\sigma$ Phase precipitation and its effect on the mechanical properties of a super duplex stainless steel, 149
submicrocrystalline 18-10 stainless steel: structure formation, mechanical and corrosion properties, 217
Melt processing
evaluation of interface stability and melt-processing techniques of $Ni_3Al$/SiC particulate composites, 207
Melting
residual stresses induced in steel by laser melting, L51
Metal matrix composites
is creep in discontinuous metal matrix composites lattice diffusion controlled?, 141

Metals
brazing residual stresses in components of different metallic materials, 95
Microstructure
observations on deformation characteristics and microstructure in an Al–Mg alloy during serrated flow, 1
Migration
the ion-beam mixing of an aluminium layer with an iron substrate and the migration distance of the aluminium, L33
Molybdenum
effect of post-forging heat treatment on the microstructure and room temperature tensile properties in Ti–25Al–10Nb–3V–1Mo (super $\alpha 2$), 23

Neodymium
selective area carburizing of low carbon steel using an ND:YAG laser, 231
Nickel
evaluation of interface stability and melt-processing techniques of $Ni_3Al$/SiC particulate composites, 207
evolution of microstructure in laser surface alloying of aluminium with nickel, 75
influence of work hardening on the reactive stress in a TiNi shape memory alloy, L41
investigation of diffusion mechanisms during nickel oxide film growth by an isotope separation technique, 103
mechanical behavior of powder metallurgy Al–Fe–Ni alloys, 127
self-diffusion of $^{63}Ni$ along dislocations, 9
Niobium
effect of post-forging heat treatment on the microstructure and room temperature tensile properties in Ti–25Al–10Nb–3V–1Mo (super $\alpha 2$), 23
Nitrogen
investigation of microstructure and crack behaviors in hot-pressed $TiB_2$–$Si_3N_4$ composites, 157
laser synthesis of ultrafine $Si_3N_4$–SiC powders from hexamethyldisilazane, L23
Notch cutting
Raman spectroscopic studies of phase transformations induced by a notch cut on a 3Y–TZP sample, L37

Oxidation
$Y_2O_3$ film deposition on type 304 stainless steel by a Langmuir–Blodgett technique and its effect on oxidaton, L13
Oxygen
constitutive description of high temperature creep in mechanically alloyed Al–C–O alloys, 37
investigation of diffusion mechanisms during nickel oxide film growth by an isotope separation technique, 103
surface alloying of copper with chromium by $CO_2$ laser, 199
$Y_2O_3$ film deposition on type 304 stainless steel by a Langmuir–Blodgett technique and its effect on oxidation, L13

Particulates
evaluation of interface stability and melt-processing techniques of $Ni_3Al$/SiC particulate composites, 207
Phase transformation
Raman spectroscopic studies of phase transformations induced by a notch cut on a 3Y–TZP sample, L37
Plasticity
a simple formula for cavity growth rate considering cavity interlinkage during superplastic deformation, L9
an evaluation of the strain contributed by grain boundary sliding in superplasticity, 225
Powder metallurgy
mechanical behavior of powder metallurgy Al–Fe–Ni alloys, 127
Precipitation
$\sigma$ Phase precipitation and its effect on the mechanical properties of a super duplex stainless steel, 149
the effect of Widmanstätten-type $\alpha 2$ precipitates on room temperature deformation and fracture behaviour of a $\gamma$-TiAl-based alloy, 45

Raman spectroscopy
Raman spectroscopic studies of phase transformations induced by a notch cut on a 3Y–TZP sample, L37

Shape memory alloys
influence of work hardening on the reactive stress in a TiNi shape memory alloy, L41
Silicon
effect of temperature rise of sprayed deposits of an Fe–2.19wt.%C–0.68wt.%Si alloy during thermal spraying on the structures and the mechanical properties, 85
investigation of microstructure and crack behaviors in hot-pressed $TiB_2$–$Si_3N_4$ composites, 157
laser synthesis of ultrafine $Si_3N_4$–SiC powders from hexamethyldisilazane, L23
Silver
on the formation of $\mu$ and $\zeta$ phases in the Ag–Al system by mechanical alloying, 119
Soft and hard region theory
relationship between the applied stress and cell diameter from the soft and hard region theory, L5
Steel
$\sigma$ Phase precipitation and its effect on the mechanical properties of a super duplex stainless steel, 149
interaction between thermal recovery and the change in strain path in low carbon steel, 111
mathematical description for flow curves of some stable austenitic steels, L1
protection of duplex stainless steel from localized corrosion by surface "superpassivation", L45
residual stresses induced in steel by laser melting, L51
selective area carburizing of low carbon steel using an Nd:YAG laser, 231
submicrocrystalline 18-10 stainless steel: structure formation, mechanical and corrosion properties, 217
surface segregation in low carbon steels, 187
$Y_2O_3$ film deposition on type 304 stainless steel by a Langmuir–Blodgett technique and its effect on oxidation, L13
Strain
an evaluation of the strain contributed by grain boundary sliding in superplasticity, 225
effect of loading ramp on cyclic stress–strain response and cyclic creep behaviour, 15
interaction between thermal recovery and the change in strain path in low carbon steel, 111
Stress
brazing residual stresses in components of different metallic materials, 95
effect of loading ramp on cyclic stress–strain response and cyclic creep behaviour, 15
influence of work hardening on the reactive stress in a TiNi shape memory alloy, L41
microstructure and susceptibility to stress corrosion cracking of Al–Zn–Mg weldments (AA-7071), 173
relationship between the applied stress and cell diameter from the soft and hard region theory, L5

residual stresses induced in steel by laser melting, L51
Structure formation
submicrocrystalline 18-10 stainless steel: structure formation, mechanical and corrosion properties, 217
Superpassivation
protection of duplex stainless steel from localized corrosion by surface "superpassivation", L45
Surface modification
surface modification of aluminium by electrical discharge alloying, 193
Surface segregation
surface segregation in low carbon steels, 187

Tensile properties
effect of post-forging heat treatment on the microstructure and room temperature tensile properties in Ti–25Al–10Nb–3V–1Mo (super $\alpha 2$), 23
Thermal recovery
interaction between thermal recovery and the change in strain path in low carbon steel, 111
Thermal spraying
effect of temperature rise of sprayed deposits of an Fe–2.19wt.%C–0.68wt.%Si alloy during thermal spraying on the structures and the mechanical properties, 85
Titanium
effect of post-forging heat treatment on the microstructure and room temperature tensile properties in Ti–25Al–10Nb–3V–1Mo (super $\alpha 2$), 23
influence of work hardening on the reactive stress in a TiNi shape memory alloy, L41
investigation of microstructure and crack behaviors in hot-pressed $TiB_2$–$Si_3N_4$ composites, 157
the effect of Widmanstätten-type $\alpha 2$ precipitates on room temperature deformation and fracture behaviour of a $\gamma$-TiAl-based alloy, 45
Tungsten
characterization of W–Me–C (Me = Fe, Co) films and their structural behaviour with temperature, 165

Vanadium
effect of post-forging heat treatment on the microstructure and room temperature tensile properties in Ti–25Al–10Nb–3V–1Mo (super $\alpha 2$), 23

Welding
effects of alloying additions on the microstructures, mechanical properties and weldability of $Fe_3Al$-based alloys, 59
Work hardening
influence of work hardening on the reactive stress in a TiNi shape memory alloy, L41

Yttrium
selective area carburizing of low carbon steel using an Nd:YAG laser, 231
$Y_2O_3$ film deposition on type 304 stainless steel by a Langmuir–Blodgett technique and its effect on oxidation, L13

Zinc
microstructure and susceptibility to stress corrosion cracking of Al–Zn–Mg weldments (AA-7071), 173
